

Coffee Shop Sales

Main objectives

The main objective of this project is to analyze retail sales data to gain actionable insights that will enhance the performance of the Coffee Shop.

Recommended Analysis

- How do sales vary by day of the week and hours of the day?
- Are there any peak times for sales activity?
- What is the total sales revenue for each month?
- How do sales vary across different store locations?
- What is the average price /order per person?

Recommended Analysis

- Which product are the best selling in term of quantity and revenue?
- How do sales vary by product category and type?

Overview of Project

Project Title: Coffee Shop Sales Analysis

Overview:

This project analyzes sales data from a coffee shop to uncover insights related to revenue, product performance, and customer behavior. The dataset contains transaction-level details including product names, quantities, unit prices, and timestamps.

Objectives:

- Identify top-selling products by quantity and revenue
- Analyze sales trends over time (daily, weekly, monthly)
- Calculate average sales per order and unit pricing
- Understand customer purchasing behavior
- Provide recommendations for inventory and marketing focus.
